Front-End Web_Developer

in LINKEDIN   **⌗ GIT-HUB**

I'm a web design adventurer who loves turning sparks of ideas into dazzling, user-friendly websites. Think captivating visuals that dance on your screen, guiding you through seamless experiences on any device, from desktops to pocket rockets. I'm all about crafting websites that feel as good as they look.

E&TC

Bachelor of engineering
SPPU University | 2020 - 2024

HSC

Science

Maharashtra State Board of Secondary and Higher Secondary Education| 2019 - 2020

Project

Blogs

Live World Blogs

Forget boring newsfeeds! Imagine a world unfolding before your eyes like a living painting. We're talking vibrant updates buzzing around on snazzy web pages, crafted with the magic of HTML and CSS. Headlines like Tech-World , Wild-life with the world's heartbeat, and images whispering untold stories. This is oh-so-creative!
Flex-Gride(CSS), HTML, API's

Study-Sync

Front-end Web-Design

A website bursting with creative energy, built with the magic of HTML and CSS. We'll use our design superpowers to weave a web of wonder, showcasing their work in a way that stuns your eyeballs and tickles your brain. No boring boxes, just interactive journeys, eye-catching visuals, and stories that leap off the screen.

Image Engine

Image Search Engine

I have built a dynamic image search engine leveraging HTML, CSS, and JavaScript. Implemented user-friendly search functionality and API integration, showcasing proficiency in front-end web development. Demonstrated problem-solving skills and attention to user experience while creating a functional and visually appealing platform
